Inspired by Frank Lloyd Wright's „Fallingwater“, one of the most famous architectural icons of the world, thrones this beautiful modern version above the Don Cayo Golf Course in Altea. The view of the Bay of Altea, with the Golf Course, the mountains and the Mediterranean, is absolutely breathtaking. The strikingly spacious underground garage offers space for six cars. The lift leads directly from the garage to the entrance, which provides access to the luxurious furnished living room with open-plan office area and a seamlessly integrated Italian designer kitchen with island. The striking open design of this space reinforces the feeling of light and space. Around the living areas there are several terraces with a spectacular 360-degree view. The terrace with jacuzzi in the open overlooks the beautiful Bay of Altea and is the perfect place to spend many romantic evenings. In the top floor there is also a lot of space, with four spacious bedrooms and three bathrooms, two of which are en suite. All bedrooms have their own terrace. There is a separate guest accommodation with two bedrooms, two bathrooms, a private living room and a kitchen. On this level there is also a luxurious infinity swimming pool with a large sun terrace. The optimal sun orientation and the beautiful view invite you to enjoy the pool terrace from early morning until late evening. Who prefers something more active, can practice their mini-golf in the garden with their own mini-golf course. The villa is equipped with all imaginable comforts, including floor heating, gas boiler and central air conditioning, making it the perfect home for both winter and summer. This modern masterpiece manages to connect effortless architecture, maximum comfort and breathtaking views. You will never want to leave.
